Summary

I am a PhD student at the University of Oklahoma conducting research in astrodynamics and currently pursuing fellowship support for my research, as well as employment opportunities.

Skills

- Languages/Frameworks: Python, MATLAB, R, C, Fortran, LaTeX, Git, Linux
- Tools: CAD (Solidworks/AutoCAD)
- Domains: Astrodynamics, Aerospace, Systems, Simulations

Education

Master of Science in Aerospace Engineering
University of Oklahoma ..... December, 2025

Bachelor of Science in Engineering Physics, Minor in Mathematics
University of Oklahoma ..... December, 2023

Experience

Graduate Research Assistant, University of Oklahoma
Norman, OK ..... January, 2024– January 2026

- Researched asteroids and created Mass Concentration models of asteroids for simulations.
- Developed software for modeling, simulation, and orbital analysis as well as Graphic User Interfaces (GUIs).

Graduate Teaching Assistant, University of Oklahoma
Norman, OK ..... January, 2025– May 2025

- Graded project papers and homework, and offered office hours weekly to aid students.
- Lead lecture and course material review for an exam while the professor was away.

Research Intern, Langston University/NASA/LUNAR-BC
Remote ..... June, 2020– August 2020

- Performed research on plants and probiotics that would help alleviate immune dysregulation for crew members on their journey to Mars.
